

What to Expect: The First Night & First Three Cleans

The City Wide Night Manager works alongside your crew for the first three cleans. This checklist is what good looks like, night by night.

Before the First Night

- ☐ Keys, alarm codes, and light locations verified during the day
- ☐ Janitor closet accessible, clean, organized, and stocked
- ☐ Scope of work, building information sheet, and SDS in the closet
- ☐ Cleaning window set, ideally right after the business closes

Night 1: Learn the Building, Nail the Basics

- ☐ Walk through with the crew before starting; review the scope room by room
- ☐ Workload the building together: route, order, and time targets
- ☐ Basics done perfectly: restrooms cleaned and stocked, all trash out, common areas clean, building secured
- ☐ Verify access details: dispenser keys, room locks, alarm codes, lights
- ☐ Final the building together before lock up; recap any issues

EXPECT NIGHT 1 TO RUN LONG

A new building takes 1.5 to 2 times the steady state time on night one. That is normal and planned for. The timeline improves every night.

Clean 2: Tighten the Route, Start the Detail

- ☐ Timeline improved from night 1
- ☐ Detail work reviewed from the 100 percent checklist
- ☐ Client feedback from the morning visit relayed to the crew
- ☐ Final walk through together; recap sent

Clean 3: Near Target, Building at Standard

- ☐ Times close to the workloaded plan
- ☐ Detail items progressing toward 100 percent
- ☐ Final walk through together; recap sent
- ☐ Once quality holds, regular scheduled visits begin

The 100 Percent Building Checklist

- ☐ Edge all carpets; move chairs and clean behind and under everything
- ☐ High and low dusting, including under objects (put them back exactly)
- ☐ Spot wash doors, door frames, and light switches
- ☐ Dust all woodwork, shelves, furniture, and desk fronts
- ☐ Scrub wax buildup off baseboards; detail thresholds and elevator tracks
- ☐ Detail the outside of toilets and urinals, base to bowl
- ☐ Wash walls and partitions in restrooms and around trash cans
- ☐ Blinds and carpet spotting as required by the scope
