

New Building Inventory Planner

Pick the building size and the cleaning type, load the kit below, and the crew never runs out mid shift.

The 3x Rotation Rule

BUILT INTO EVERY QUANTITY

One set in use tonight, one set in the laundry, one clean spare on the shelf. If you only buy one set, you are choosing between skipping the laundry and skipping the cleaning.

Base Starting Kit by Building Size

Quantities below are for General Janitorial service. Apply the adjustments for your cleaning type on the next page.

ITEM	SMALL UP TO 5,000 SF	MEDIUM 5,001 TO 15,000 SF	LARGE 15,001 TO 40,000 SF	VERY LARGE OVER 40,000 SF
Dual chamber mop bucket (WaveBrake or equal) Clean water and dirty water stay separated	1	1	2	2
Flat mop frame & handle, 18 inch	1	2	3	4
Flat mop pads, general floors (blue or green) Swap pads about every 500 to 750 sq ft of hard floor	6	12	24	36
Flat mop pads, restrooms (red) Restroom pads never leave the restroom rotation	3	6	9	12
Microfiber cloths, green (general cleaning & dusting) Retire one cloth per zone, about every 250 to 300 sq ft	12	24	36	48

ITEM	SMALL UP TO 5,000 SF	MEDIUM 5,001 TO 15,000 SF	LARGE 15,001 TO 40,000 SF	VERY LARGE OVER 40,000 SF
Microfiber cloths, blue (glass & mirrors)	12	12	24	24
Microfiber cloths, yellow (restroom surfaces) Cloths turn over faster in restrooms; plan extra	12	24	36	48
Microfiber cloths, red (toilets & urinals only)	12	24	36	48
HEPA backpack vacuum	1	1	2	3
Utility looped string mop & standard bucket For spills and heavy soil only, not nightly mopping	1	1	1	2
Toilet bowl mop	1	2	3	4
Spray bottles with trigger, labeled Label every bottle; never leave a mystery bottle on site	4	6	8	12
Wet floor signs, English & Spanish	2	2	4	6
Nitrile gloves (box of 100)	1	2	3	4
High duster with extension handle	1	1	2	2

Adjustments by Cleaning Type

General Janitorial

- The base kit above is built for standard nightly service, up to 5 nights per week.
- Launder microfiber after every shift. The 3x rotation only works if the laundry loop never stalls.

Frequent / Day Porter

- Day porters burn through cloths faster because there is no overnight laundry buffer. Quantities above are already increased by half.
- Build a restroom check kit that lives on the caddy: gloves, red and yellow cloths, bowl mop, and restock supplies.

Adjustments to the base kit: Multiply microfiber cloths by 1.5; Multiply flat mop pads by 1.5.

ADDED ITEM	SMALL UP TO 5,000 SF	MEDIUM 5,001 TO 15,000 SF	LARGE 15,001 TO 40,000 SF	VERY LARGE OVER 40,000 SF
Cleaning caddy or cart for day rounds	1	1	2	2
Extra spray bottles for the caddy	2	2	4	4

Medical

- Treatment areas get a fresh mop pad on a set interval, not when the pad looks dirty. Plan roughly one pad per 4 to 6 patient stations.
- Isolation rooms use dedicated, color coded tools that never clean anywhere else.
- Read the Medical Facility Cleaning guide before the first shift.

Adjustments to the base kit: Multiply flat mop pads by 1.5; Multiply microfiber cloths by 1.5.

ADDED ITEM	SMALL UP TO 5,000 SF	MEDIUM 5,001 TO 15,000 SF	LARGE 15,001 TO 40,000 SF	VERY LARGE OVER 40,000 SF
Dedicated isolation room kit (bucket, frame & yellow tools)	1	1	1	2
PPE set: masks, safety glasses & disposable booties	1	2	2	3

Clean Room

- The standard kit covers offices, hallways, and support areas OUTSIDE the classified space only.
- Nothing enters the clean room unless it is on the client's approved supply list. No cotton, no brooms, no standard microfiber.
- Read the Clean Room Cleaning guide; gowning and conduct rules are strict and non negotiable.

ADDED ITEM	SMALL UP TO 5,000 SF	MEDIUM 5,001 TO 15,000 SF	LARGE 15,001 TO 40,000 SF	VERY LARGE OVER 40,000 SF
Tacky mats (case)	1	1	2	2
Cleanroom approved wipers & mops (client approved list)	1	1	2	2

GMP / Food

- Production zones need roughly one mop pad per 150 to 200 sq ft, so pad counts above are doubled.
- Tools never cross zones. Yellow allergen tools launder separately from everything else.
- Read the GMP & Food Facility Cleaning guide; drains and zone transitions are where accounts are won or lost.

Adjustments to the base kit: Multiply flat mop pads by 2; Multiply microfiber cloths by 1.5.

ADDED ITEM	SMALL UP TO 5,000 SF	MEDIUM 5,001 TO 15,000 SF	LARGE 15,001 TO 40,000 SF	VERY LARGE OVER 40,000 SF
Dedicated zone kit, orange (production floor)	1	1	2	2
Dedicated zone kit, yellow (allergen & segregated zones)	1	1	1	2
Drain brushes, one per zone, stored off the floor	2	3	4	6
Sanitizer test strips	1	1	2	2
PPE set: hair nets, beard covers, booties & smocks	1	2	3	4

Where the Numbers Come From

- **Flat mop pads:** change the pad about every 500 to 750 sq ft of hard floor.
- **Microfiber cloths:** retire a cloth per zone, roughly one per 250 to 300 sq ft of surface work; restrooms burn cloths faster.
- **Team model:** quantities assume the City Wide 4 specialist team approach on larger buildings.

Before You Load the Van

- ☐ Kit matches the table for this building size and type
- ☐ Every cloth and pad color is stocked: red, yellow, blue, and green
- ☐ Chemicals are labeled, diluted correctly, and spray bottles are marked
- ☐ Vacuum runs, filter is clean, and a spare belt and bags are packed
- ☐ Wet floor signs, gloves, and PPE are in the vehicle
- ☐ Laundry plan is confirmed: who washes, where, and by when
- ☐ Building keys, alarm codes, and the scope of work are in hand
